- Syringes, all sizes, sterile only
- Thermometers
- Tracheostomy and cricothyroidotomy supplies
- Underpads/Chux
- Urinary catheters, insertion kits and drainage bags
- Ventilator tubing

Need some ideas?

Surgery Departments: OR and Day surgery departments can collect items which are still sterile and left over from kits. Project C.U.R.E. will sort these items and ensure they are proper for shipment. Expired kits are also welcome

Labor and Delivery: Maternal and Infant Mortality rates are high in most countries served by Project C.U.R.E. Excess items in these areas are greatly appreciated.

Sterile Processing: Project C.U.R.E. has an ongoing need for surgical instruments

Housekeeping: Carts and Linens
