We will do our best work in meeting the needs of one another, our donors, our partners, and the sick and dying around the world. Despite the fact that most of our assets are of one another, our donors, our partners, and the sick and dying around the world. We will gain an increasing body of knowledge and expertise to be used, together with these other objectives, to see our vision become reality. We will gain an increasing body of knowledge and expertise to be used, together with these other objectives, to see our vision become reality.

MISSION
Project C.U.R.E. identifies, solicits, collects, sorts, and distributes medical supplies and services according to the imperative needs of the world.

CREDIBILITY & INTEGRITY
We will be honest. We won’t make promises that we can’t keep, and we will keep the promises that we’ve made.

CREDIBILITY & INTEGRITY
We will be honest. We won’t make promises that we can’t keep, and we will keep the promises that we’ve made.

INFORMATION & COMPETENCE
We will become experts in our area of service. We will gain an increasing body of knowledge and expertise to be used, together with those other objectives, to see our vision become reality.

STEWARDSHIP
We seek to assist other individuals and organizations that share our common vision.

CREATIVITY & INGENUITY
We will endeavor to pioneer new ways of meeting the needs of others, being stewards of our resources and solving problems—from the small inconveniences to the major obstacles.

EXCELLENCE IN SERVICE
We will do our best work in meeting the needs of one another, our donors, our partners, and the sick and dying around the world.

LETTER FROM THE PRESIDENT

Now is not the time to take our foot off this gas. I am committed to lead this organization forward and I am confident that the members of the Project C.U.R.E. team—all its dedicated volunteers and staff—have the intelligence, determination and energy to grow this movement until the day comes when our partners raise their hand and say, “Thank you for helping us when we needed it, but now we can take it from here.”

This year we will launch several new training programs and increase the number of C.U.R.E. Clinic trips, with a new effort to support surgical programs, among others. And plans are underway to add a seventh Distribution Center soon.

We will gain an increasing body of knowledge and expertise to be used, together with those other objectives, to see our vision become reality.

We will gain an increasing body of knowledge and expertise to be used, together with those other objectives, to see our vision become reality.

Two decades. That is a lot of time to do to do pretty much anything and certainly there are few people who have committed to remain at the helm of any organization for that long. But I am more engaged and more encouraged now than at any point in my tenure as President and CEO of Project C.U.R.E.

In the pages of this Annual Report, you will see why.

First, what we are doing is working. There are few things that encourage us forward like success. Both academic research and life experience confirm this to be true. For example, this past year, Project C.U.R.E. completed our Saving Mother’s Dying Life five-year initiative with USAID, ACOG, Merck and Every Mother Counts in Zambia. The results are beyond our wildest expectations. Working together, we were able to reduce maternal mortality by approximately 60 percent. And that isn’t the only piece of good news. The world over, Project C.U.R.E.’s efforts to save lives, reduce suffering and change the world have made momentous strides toward strengthening the healthcare systems for childhood diarrhea. These training programs have directly impacted the lives of nurses and midwives in techniques to distribute medical supplies and equipment that saves lives. No other organization in the world delivers more high-quality of one another, our donors, our partners, and the sick and dying around the world. Despite the fact that most of our assets are of one another, our donors, our partners, and the sick and dying around the world. We will gain an increasing body of knowledge and expertise to be used, together with those other objectives, to see our vision become reality.

The NEED

15,000 children
UNDER THE AGE OF FIVE DIE EVERY DAY— WITH MORE THAN HALF OF THE CONDITIONS BEING PREVENTABLE OR TREATABLE BECAUSE FAMILIES CAN’T AFFORD OR DON’T HAVE ACCESS TO TREATMENT.

2.5 MILLION babies
DIE ANNUALLY WITHIN THE FIRST MONTH OF LIFE FROM PRETERM BIRTH COMPLICATIONS AND BIRTH ASPHYXIA.

nearly 50% of women
IN LOW-INCOME COUNTRIES GAVE BIRTH WITHOUT THE ASSISTANCE OF A PROFESSIONAL HEALTHCARE WORKER OR SKILLED BIRTH ATTENDANT.

3 BILLION people
AROUND THE WORLD SURVIVE ON $2.50 OR LESS A DAY—LIMITING ACCESS TO FOOD, EDUCATION, HEALTHCARE AND OTHER BASIC SERVICES.

2.4 BILLION people
MORE THAN A THIRD OF THE WORLD’S POPULATION—CURRENTLY HAVE NO ACCESS TO A BASIC HEALTH FACILITY. MANY MORE LIVE IN COUNTRIES WHERE HEALTH SYSTEMS ARE UNDER-FUNDED AND OVERSTRETCHED.

99% of all maternal deaths
OCUR IN DEVELOPING COUNTRIES. EACH DAY, APPROXIMATELY 830 WOMEN DIE FROM PREVENTABLE CAUSES RELATED TO PREGNANCY AND CHILDBIRTH.

Our C.U.R.E. Clinics and Training team takes medical professionals to our Cargo recipient hospitals to provide medical care for patients there. Project C.U.R.E.’s approach is unique in the humanitarian space in that we work to augment and enhance our partners and increase demand for the existing hospital. Along with the increasing number of C.U.R.E. Clinic trips, Project C.U.R.E. is rapidly increasing our curriculum of teaching opportunities. Currently, we are training nurses and midwives in Helping Babies Breathe, and have taught those professionals to save the lives of thousands of newborns around the world. Project C.U.R.E. provides training for Helping Mothers Survive, and on the heels of a very successful execution of Saving Mothers, Giving Life, our strategic plan includes expanding these training programs.

Project C.U.R.E. is the world’s largest distributor of donated medical supplies to resource-limited communities across the globe, touching the lives of patients, families, and children in hospitals to provide medical care for patients there.
Project C.U.R.E. is impact and innovation driven with a multitude of programs that are strengthening healthcare infrastructure, while tending to the needs of patients and empowering medical personnel in under-resourced communities around the globe. Project C.U.R.E.’s Cargo program delivers 40-foot semi-trailer sized cargo containers carrying medical donations to hospitals, clinics and community health centers in developing countries. We conduct a complex inspection, inventory and logistics process that annually places millions of dollars’ worth of medical supplies and modern equipment directly into the hands of doctors and nurses so they can provide quality care to their patients, many of whom are women and young children.

During 2017-2018, Project C.U.R.E. delivered 181 SHIPMENTS carrying $60,947,977 in medical supplies and equipment to 50 COUNTRIES. Project C.U.R.E. collaborates with partners in each country to develop a high-level understanding of the scope of need. Our thorough, on-site Needs Assessment process ensures that every container delivered will meet the specific needs of the recipient hospital or clinic, equipping the medical staff with the tools to improve diagnosis, treatment and care.

Last year, we conducted 200 ASSESSMENTS IN 36 COUNTRIES, spending 362 WORKING DAYS in the field.

My husband and I are very fortunate and delighted to cooperate with Project C.U.R.E. in providing much-needed medical supplies to our hospitals in Serbia. There is a very difficult situation with our hospitals—they need to be equipped properly in order for our doctors and nurses to provide care for the patients. Our children, our people and heroic doctors and nurses are waiting for us to help them. Project C.U.R.E. has managed to help with the needs in so many hospitals including ours, through their endless hours of hard work and persistence, regardless of religion or ethnic origin. I am very grateful to Project C.U.R.E., which provides help all over the world and saves lives every day.

HRH Princess Katherine of Serbia
PROC.U.R.E.

Working with hospitals and clinics across the country, Project C.U.R.E. collects life-saving equipment and supplies through our ProC.U.R.E. program. Project C.U.R.E. receives regular donations from more than 400 partners, providing domestic health facilities with an environmentally friendly way to redirect surplus product and retired equipment.

Procurement volunteers work with hospital staff, including materials management, supply chain personnel, and clinical engineering to acquire these valuable items and get them into the hands of medical professionals that need them most around the world. These partnerships create shared value, as well as greater societal impact, resulting in powerful healthcare transformations for our partners overseas.

In addition to hospitals, medical manufacturers and distributors have made a significant difference in the quality of product that Project C.U.R.E. provides. From hospital beds and gurneys, to anesthesia machines and infant incubators, manufacturers can channel trade-in or refurbished equipment to Project C.U.R.E. For our recipients these donations are truly life changing. Take Daniel, a third grader from Campeche, Mexico diagnosed with Osteogenesis Imperfecta or “brittle bone disease.” For Daniel the use of a wheelchair is imperative, but trying to maneuver one manually is difficult. Thanks to our generous partners, we were able to provide Daniel with his first electric wheelchair. The joy and excitement of receiving this gift is evident on his face. Thank you to all of our partners for spreading health & hope to people like Daniel around the globe!

GLOBALLY, THE DEMAND FOR MEDICAL EQUIPMENT AND PRODUCTS CONTINUES TO OUTPACE OUR INBOUND SUPPLY, SO NEW RELATIONSHIPS WITH HOSPITALS AND MANUFACTURERS ARE ALWAYS BEING FORGED.

We are overwhelmed by the generosity of our ProC.U.R.E. Partners who helped us put quality medical supplies and equipment in 50 countries last year!

On behalf of the Clergy, Religious and entire Christ’s faithful of the Catholic Diocese of Port Harcourt, I write to appreciate your prompt response to my appeal for medical equipment for our Diocesan Hospital. When I personally visited the hospital and sighted the donated items, I was profoundly overwhelmed by the quality and quantity of the equipment. It is pertinent to note that the equipment will not only upgrade our Hospital but will enhance our medical services and health care delivery. Thank you for bringing hope and succor to many who are sick and in dire need of medical care.

MOST REV. CAMILLIUS ETOKUDOH | CATHOLIC BISHOP OF PORT HARCOURT | PORT HARCOURT, NIGERIA
Last year, C.U.R.E. Clinics & Training delivered health & hope to 12 countries around the world. Our Clinics & Training volunteers make a long-term impact on communities by providing free medical assistance & educational training to thousands of patients and healthcare providers, while experiencing the adventure of another culture. There is great demand for physicians, OB/GYNs, pediatricians, surgeons, nurse practitioners and nurses, but non-medical participants are welcome to participate.

In 2017, C.U.R.E. Clinics completed 26 Clinics and training trips serving more than 10,500 patients and training 584 community health workers or other medical professionals. The C.U.R.E. Clinics program has experienced a 93 percent increase in clinician participants on a year-over-year basis.

By partnering with Project C.U.R.E., I am able to pursue my passion—improving neonatal care in low and middle-income countries. With Project C.U.R.E.’s support I can ensure that every baby, no matter where the baby is born, will receive the same excellent care that will allow her to fulfill her full potential as a human being by giving her the opportunity to have a happy life.

CARLOS G. RAMOS, MD, NEONATOLOGIST | ASSOCIATE PROFESSOR OF PEDIATRICS | DIVISION OF NEONATOLOGY | UNIVERSITY OF CALIFORNIA SAN DIEGO

LAST YEAR, C.U.R.E. CLINICS PROVIDED SERVICES IN:
# SURINAME | GHANA | EGYPT | MAURITANIA
# PARAGUAY | NICARAGUA | UGANDA | GUATEMALA
# MEXICO | PERU | RWANDA | PANAMA

A C.U.R.E. Clinics team helps a patient in Ghana.
KITS FOR KIDS is a simple, powerful package, filled with personal hygiene and basic “medicine cabinet” items that are scarce in the developing world. Due to a lack of access to basic healthcare, millions of children die each year of preventable and treatable conditions. Kits for Kids allows parents to provide their children with basic care at home instead of having to travel a long distance by bicycle, bus or even foot. These basic supplies can mean the difference between life and death for kids around the world.

The Kits for Kids program provides a fun way for businesses, local schools, youth groups or Scouts to complete service-learning projects and is a fun activity for groups of any size.

There was a magical moment when I looked into the eyes of this mother that let her know that I cared for her and her family. By giving her a Kits for Kids bag, she could now help herself and her family. Her appreciative response was heartwarming.

CAROL GRUDIS | DENVER, COLORADO

7,530 KITS FOR KIDS DELIVERED TO 27 COUNTRIES AROUND THE WORLD LAST YEAR, INCLUDING...
ARMENIA | CAMBODIA | CAMEROON | CGOSO | COTE DIVOIRE | DJIBOUTI | DOMINICAN REPUBLIC | EQUATORIAL GUINEA | ELSANHOGRI | GHANA | GUATEMALA | HAITI | HONDURAS | INDIA | KENYA | KYRGYZSTAN | MALAWI | MAI | MEXICO | MOZAMBIQUE | NIGERIA | PALAU NEW GUINEA | SAO TOME AND PRINCIPE | TOGO | UGANDA | ZAMBIA

National Honor Society students pack Kits for Kids to help children receive basic home care.

This C.U.R.E. Kit was delivered to the Yida Refugee Camp in South Sudan, where more than 70,000 refugees are living. W. Godwin said, “Thank you so much for the supplies, they went a long way.”

C.U.R.E. KITS are suitcase-sized, pre-packed duffels of basic medical supplies that can be easily transported and checked as luggage on international trips to communities in need. For a donation of $200, travelers can deliver health and hope to an underserved region of the world, or they can sponsor a Kit for another traveler. These Kits include essential exam materials, wound care and personal hygiene items—supplies that are critical to have, yet desperately lacking in most clinics in developing countries.

276 C.U.R.E. KITS were hand-carried to 43 global countries.

TOP 10 COUNTRIES FOR C.U.R.E. KIT DELIVERIES:
- COLOMBIA
- GHANA
- GUATEMALA
- HAITI
- KENYA
- MEXICO
- NICARAGUA
- NIGERIA
- PUERTO RICO
- THAILAND

The C.U.R.E. Kit arrived in Cameroon and was received by the health worker from Toko. This is the only health worker in the Toko area—serving dozens of villages—and he has almost nothing to work with in terms of medical supplies because the war has escalated and it is too dangerous to deliver directly to his village. So far, 73 villages in the western region of Cameroon, where this Kit will be used, have been burned to the ground. Families have fled into the jungle and are desperately in need of food and medical care. Therefore, this Kit is incredibly important. Thank you!

LISA SPADER | VOLUNTEER HEALTH WORKER | ALBUQUERQUE, NM
Because of Project C.U.R.E.’s donation of two Stryker drills, the World Pediatric Project was able to host simultaneous scoliosis brigades in Barbados and St. Vincent and provide 9 posterior spine fusion surgeries, 1 lengthening surgery and 30 evaluations and countless thrilled family members. “A huge thanks to you for once again donating a drill to benefit World Pediatric Project patients. We are thrilled to have you as a partner for equipment needs. The surgeons would not have been able to do three posterior spine fusions in one day had they been required to drill manually—your donation allowed us to help more children.”

ALICIA MANTEIGA | INTERNATIONAL TEAMS PROGRAM MANAGER | WORLD/PEDIATRIC PROJECT | ST. LOUIS, MO

Since 2011, Project C.U.R.E. has collaborated with Stryker to provide orthopedic drill sets to doctors and hospitals abroad. We have delivered 424 Stryker Kits to 30+ countries and more than 500 hospitals and clinics. In 2017, we launched a successful expansion of the programs and began including Neuro, Spine, and ENT Kits.

STRYKER KITS

Thousands of people die every day in the developing world because local hospitals & clinics don’t have the medical supplies and equipment needed to save lives in their communities. Children are missing the chance to get an education and live a full life due to illnesses that would be treatable if they had access to proper health services. It’s Project C.U.R.E.’s mission to change that!

Our six distribution centers hold millions of dollars’ worth of medical supplies & equipment—hospital beds, wheelchairs, gloves, and more—ready to be delivered to hospitals & clinics all across the world, from Albania to Zimbabwe. But we need your help getting these items there.

SPONSORING A BOX FOR $25 A MONTH DELIVERS $6,000 WORTH OF MEDICAL SUPPLIES & EQUIPMENT TO THE MOST NEEDY HEALTH FACILITIES AROUND THE WORLD.

Becoming a Project Partner puts you in the company of thousands of others who have helped improve global healthcare with Project C.U.R.E. over the past 30+ years. Each month, your sponsored box will ensure that a hospital in India receives the supplies to set up IVs, or that a clinic in Papua New Guinea has clean gloves to treat wounds or that a hospital in Guatemala can deliver healthy babies while taking care of mommies.

TOGETHER, WE WILL DELIVER HEALTH & HOPE TO THE WORLD.

$25

A MONTH

SAVES LIVES EVERYDAY!

PROJECT PARTNERS

Orthopedic surgeons help children all over the world.
Project C.U.R.E.’s PhilanthroTravel program offers a unique opportunity for donors to connect firsthand with our work around the world. From volunteering with the country’s medical community and meeting with patients and staff in hospitals in need, to engaging with community leaders and experiencing the country’s unique culture, a PhilanthroTravel adventure will be one of the most powerful experiences of your life.

PHILANTHROTRAVEL ADVENTURES OVER THE YEARS INCLUDE:
BELIZE | CUBA | GUATEMALA | KENYA | MEXICO | PANAMA | TANZANIA | UGANDA | ZAMBIA

My first PhilanthroTravel trip was an eye-opener to the realities of the health needs in developing countries. I have gone on a number of trips including Belize, Panama and Kenya. The like-minded people you meet on these adventures become lifetime friends—working side-by-side with them helping others and then spending quality time with them sharing unique experiences like an African safari, scuba diving in the Amazon or meeting tribal leaders. Project C.U.R.E.’s PhilanthroTravel trips are well-organized, meticulously planned and are truly a life-altering experience!

CHARLES IRION | EXECUTIVE COMMITTEE | PHOENIX AMBASSADOR BOARD | PHOENIX, AZ
AMBASSADOR BOARDS

Project C.U.R.E.’s Ambassador Board supports the work of the organization through networking, fundraising and development in each C.U.R.E. Community. The Ambassador Board consists of members with a proven commitment, compassion and ambition to help save the lives and ease the suffering of the less fortunate around the world. They help generate awareness and foster a positive image of the organization, all the while participating with us both personally and financially. Project C.U.R.E. currently has more than 200 Ambassadors serving in Denver, Phoenix, Chicago, Nashville and Washington D.C. The Ambassador Board members visit with the First Lady of Zambia. Partnerships are critical to the success of our Ambassador Board members. Many Ambassador Board members travel with us on PhilanthroTravel and C.U.R.E. Clinics trips.

YP members from across the U.S. helped a hospital in Belize organize equipment. YP Members help at a hospital in Belize.

PROJECT C.U.R.E.'S YOUNG PROFESSIONALS NETWORK

Project C.U.R.E.’s Young Professionals Network is a formal association of emerging leaders committed to advancing their professional and civic development while strengthening their place in the community and supporting Project C.U.R.E.’s mission. The Young Professionals Network is growing in each of our cities as they combine the responsibilities of philanthropy fashioned after traditional nonprofit boards of directors, with opportunities to deepen their existing professional and leadership skills. Members of the Young Professionals Network spearhead fundraising activities, coordinate volunteer projects, network with other globally conscious professionals, raise awareness of Project C.U.R.E.’s work among their networks and the broader business community, all the while taking their leadership skills and competencies to new heights.

"We often take for granted the care we get in the States. There is never a question of whether equipment will be available and functioning in order to diagnose our ailments, much less have access to clean or any consumables like a bandage. We traveled to Belize to visit hospitals where we sponsored containers filled with medical supplies and equipment. For every piece of equipment we so excitedly pointed out with a Project C.U.R.E. donation sticker on it, it was almost surely countered by the discovery of other machines, whose massive presence occupied entire rooms at times, but were rendered essentially useless. Collaboration, and a desire to help one another out, is truly the way to make the most positive change in our world. I’m so grateful to Project C.U.R.E. for the opportunity to see the transformative work of their organization firsthand, and it’s my pleasure to spread the word far and wide. I’ve seen how this organization has provided desperately needed care to the communities that need us most. The amount of lives saved from these hundreds of containers can’t possibly be counted—but there is no doubt the impact is massive and each life saved has a story of love attached to it."

CHELLY CANALES | YOUNG PROFESSIONALS BOARD MEMBER | DENVER, COLORADO
HELPING BABIES SURVIVE (HBS) is a full spectrum neonatal resuscitation curriculum developed on the premise that assessment at birth and simple newborn care are things that every baby deserves. The initial steps taught in HBB can save lives and give a much better start to many babies who struggle to breathe at birth. The focus is to meet the needs of every baby born.

HBB training is a hands-on training using newborn mannequins that simulate heartbeats, breathing and cutting the umbilical cord. The simulation takes participants through the escalation of steps used in resuscitation of a newborn. The bag/mask ventilation system and reusable suction devices are the life-saving tools used during the course. These tools are then left with participants so that they are able to put their new skills to use.

In 2017, 16 Project C.U.R.E. Master Trainers trained 82 new in-country Master Trainers in HBB modules. These in-country Master Trainers then trained 432 birth attendants in 6 countries and the U.S. in the HBB, HBS & ECSB/ECEB curriculum.

Heather Kemczinski, MD | Chicago, IL

HELPING BABIES SURVIVE (HBS) is the very best training tool currently available to decrease global neonatal mortality and morbidity. As it spreads, many more babies will come into the world safely. If just one baby was saved by my involvement with this program, I feel it was worth the effort.

432 BIRTH ATTENDANTS IN 6 COUNTRIES WERE TRAINED IN THE HMS/HBB CURRICULUM.

COUNTRIES SERVED WITH HBB TRAININGS: GhanA | India | Mauritania | Guatemala | Rwanda

Hands-on Helping Mother’s Survive training in Ghana.

HBB training in Guatemala.

Learning HBB in India.
SAVING MOTHERS, GIVING LIFE PARTNERSHIP

As a leadership partner in support of the USAID Saving Mothers, Giving Life (SMGL) program, Project C.U.R.E. continued its efforts at delivering critical supplies to hospitals and clinics in Zambia, Uganda and Nigeria. Since joining this collaborative partnership in 2013, Project C.U.R.E. has conducted on-site Needs Assessments at more than 91 healthcare facilities in Zambia, Uganda and Nigeria and the findings revealed a stark reality of neglect and severe deficiencies of even the most basic equipment and supplies.

Over the last 5 years, the Saving Mothers, Giving Life (SMGL) public/private partnership has dramatically reduced the deaths of mothers and newborns in Uganda, Zambia, and Nigeria using a comprehensive health system strengthening approach. Project C.U.R.E. has contributed substantially to these achievements and is a highly valued member of the SMGL team—providing critical medical supplies and equipment to project areas. Without these inputs, facilities are challenged to respond to and treat life-threatening complications resulting in preventable deaths. Project C.U.R.E. has also built the local capacity to maintain and service the donated equipment so that these ‘gifts’ become part of the health-system infrastructure. SMGL has been enriched by C.U.R.E.’s involvement and I look forward to our ongoing collaboration in our work in Nigeria.

CLAUDIA MORGAN CONLON, MD, MPH, USAID LEAD | SAVING MOTHERS, GIVING LIFE | WASHINGTON, DC
Last year, Project C.U.R.E. continued to provide cost-effective support in partnerships with U.S. Government agencies and dozens of other organizations based in the U.S. and overseas which are implementing large-scale health initiatives in countries around the world. Funded by the U.S. Government, private-sector donors and Non-Governmental Organizations (NGOs), Project C.U.R.E. implements multi-year grants and public-private partnerships that help our partners increase delivery of high quality health services, improve sustainability of community health systems and increase access and treatment to the highest-risk, underserved, vulnerable populations.

Project C.U.R.E.’s focus is on building capacity and strengthening healthcare systems to deal with prevention, diagnosis, and treatment of all types of diseases including HIV/AIDS, TB, Malaria and Ebola. We also work alongside technical experts in humanitarian and emergency situations to help treat victims of earthquakes and floods and increasing numbers of refugees and internally displaced persons. As the world watches the pain and suffering of those whose lives have been ravaged by conflict and humanitarian disasters, Project C.U.R.E.’s partnerships are bringing support to meet their urgent, basic medical needs and help reconstruct healthcare systems around the world.

Abercrombie & Kent Philanthropy (AKP) is partnering with Project C.U.R.E. on numerous projects where they work. Through the AKP Global Medical Assistance Program, much-needed medical supplies and equipment are being delivered to resource-limited communities.

In Zambia, AKP built a medical clinic and maternity ward in the Nakatindi Village to provide a safe place for delivery. This new facility is staffed with qualified health professionals, outfitted with appropriate and modern medical equipment and supplies for the community’s 2,800 residents and addresses the medical needs of the surrounding community. On March 15, 2018, many from near and far gathered to celebrate the much-anticipated opening of the new Nakatindi Maternity Ward, which was stocked with $200,000 worth of medical equipment and supplies from Project C.U.R.E. This milestone marks a giant step into a direction of better health for mothers and their children in this region of Zambia—a demographic burdened with a high prevalence of HIV and in critical need of more comprehensive maternal-fetal care.

Upcoming projects for this year include Tanzania, Cambodia, Uganda and Peru where 40-foot Cargo Containers of medical supplies and equipment will be delivered to specific medical facilities to help strengthen the healthcare needs in under-resourced communities.

Since the beginning of our partnership in 2012, Project C.U.R.E. and Kinross have partnered to deliver 20 forty-foot containers of medical supplies and equipment, valued at more than $7 million and have conducted multiple Needs Assessments, Impact Evaluations and trainings to support families in Ghana and Mauritania.

Between June 1, 2017 and May 31, 2018 the Project C.U.R.E. team in collaboration with Kinross completed an Impact Evaluation of medical equipment in Mauritania covering 8 of 17 health structures, which have previously benefited from the last four deliveries of medical equipment and consumables offered by Project C.U.R.E. A further initiative continued in Mauritania, the Helping Babies Breathe program, whereby 28 Midwives were trained.

In Ghana, between June 1, 2017 and May 31, 2018, Project C.U.R.E. worked with Kinross to commission and transfer three cargo containers of medical supplies and equipment to nine local health facilities, valued at more than $500,000.
NCR FOUNDATION

NCR Foundation and Project C.U.R.E. partnered to support two prioritized hospitals in the state of Telangana, India where the capital Hyderabad serves as a large employee center for NCR. NCR’s goal is to invest in targeted programs that are committed to innovative approaches and solutions that help people become self-sufficient in the communities in which their employees and customers live and work across the globe.

NCR Foundation and Project C.U.R.E. had a focus of increasing the availability of necessary medical supplies and equipment for the decision-making and delivery of care by medical professionals and increasing the training of medical professionals at Bannu Hospital and Osmania Hospital.

NCR employees kicked off this partnership by packing 1,500 Kits for Kids. The NCR Foundation later provided a 40-foot Cargo Container of medical supplies and equipment to each facility, valued at more than $1.1 million dollars.

Additionally, The NCR Foundation sponsored Helping Babies Breathe (HBB) trainings at both Osmania, serving a community of an estimated 7 million people, and Bannu serving approximately 200,000. As a result of this effort, Project C.U.R.E.’s certified Helping Babies Breathe trainers completed a total of four Helping Babies Breathe trainings at these facilities. At Bannu Hospital, three Master Trainers were chosen from previous HBB trainings, to help train 40 additional medical professionals. At Osmania Hospital, 48 medical professionals were trained. These professionals are now able to train others at the hospital and in rural areas of India who have a high percentage of neonatal death.

NEWMONT

Since 2004, Project C.U.R.E. has partnered with Newmont Mining Corporation to deliver 37 40-foot Cargo Containers valued at more than $14 million. These critically needed medical supplies and equipment have been delivered to countries where Newmont operates including Ghana, Guinea, Suriname and Liberia.

Since the beginning of the partnership, Project C.U.R.E. has delivered sixteen 40-foot containers of medical supplies and equipment and 57 C.U.R.E. Kits to Ghana. Through our partnership, we have also implemented a new Health Fair Clinic model, centered around patient education where 1,300+ patients have been evaluated. While in Ghana, Newmont has facilitated six Helping Babies Breathe training sessions and two Essential Care for Every Baby trainings.

Project C.U.R.E.’s partnership with Newmont does not stop in Ghana. This partnership has reached Suriname and Peru as well. Since 2004, seven C.U.R.E. Clinics have been held, multiple Needs Assessments and Impact Evaluations have been conducted, and five containers have been delivered in Suriname.

In 2016, the Project C.U.R.E. and Newmont partnership expanded to include the Colorado Rockies K-Meter initiative. For every strikeout thrown by a Rockies pitcher, Newmont donates $50 to Project C.U.R.E. Through this exciting initiative, Newmont has donated more than $170,000 over the last three seasons.
Since 2015, Orica and Project C.U.R.E. have helped to improve the capacity at clinics and hospitals in Ghana and the Dominican Republic and for children and families in Orica’s host communities. Over the past three years, Orica has delivered $1.4 million worth of medical supplies and equipment to facilities in Ghana and nearly $1.5 million worth to the Dominican Republic. They have participated in our Annual Golf Tournament over the last three years and their employees are very involved in volunteering at the Project C.U.R.E. Distribution Center in Denver.

Through The Equity of Access Initiative, PanTheryx partners with organizations like Project C.U.R.E. to reach the poorest, neediest children and make sure they have access to treatment. PanTheryx and Project C.U.R.E. developed a Diarrhea Management Training (DMT) program to train community health workers on diarrhea prevention and treatment, as well as, set up programs to track and monitor the program’s impact on quality of life among children in the community.

In Mexico, we have successfully conducted two DMT programs, distributed four containers of medical equipment and supplies, including more than 40,000 units of PanTheryx’s patented product, DiaResQ and shipped an additional 3,800 units of DiaResQ to Estado de Oaxaca for disaster relief aid following the September 2017 earthquake. In Guatemala, we served a remote region delivering one container of medical supplies and equipment along with 3,000 units of DiaResQ and one DMT program that was conducted for Community Health Workers with the involvement of CU Health and Human Services. Together, we also provided more than 500 units of DiaResQ to medical facilities in support of relief efforts following Hurricane Matthew on the Southwestern peninsula of Haiti. We will continue delivering additional containers of supplies, product and trainings in underserved communities to help those in need.
C.U.R.E. COFFEE

Direct Trade, Socially-Responsible Coffee.

We partner with Colorado-based Boca Java, who works directly with farmers harvesting estate coffee high in the mountains of Nicaragua and Kenya, to deliver premium coffee for a cause! Boca Java roasts C.U.R.E. Coffee fresh to order and donates $3 per bag to Project C.U.R.E., which in turn provides medical relief to the farmers who grow the beans, their families and neighbors.

Since inception, more than $800,000 in critical medical relief has been delivered to our coffee farming communities, thanks to the C.U.R.E. Coffee Program.

TULLOW OIL

Tullow Oil is a leading independent oil and gas exploration and production company, headquartered in London with operations in West Africa including Congo, Côte d’Ivoire, Equatorial Guinea, Gabon, and Ghana; the Netherlands and UK; and in East Africa in Kenya and Uganda. Since 2015, Tullow and Project C.U.R.E. have partnered in Kenya and Ghana.

As part of this partnership, Tullow Oil has built three new Outpatient Departments in the Turkana Region including Lodwar, Lokichar and Lokori where Project C.U.R.E. conducted Needs Assessments to determine the unique needs of each facility. Five container shipments to these facilities are in process and are expected to be delivered within the next year.

Project C.U.R.E. also collaborated with Tullow Oil’s Social Performance team in Ghana to help strengthen the healthcare system in Takoradi and other communities throughout the country. Tullow and Project C.U.R.E. have delivered six containers worth more than $2 million in supplies and equipment to Ghana.

JOIN US AND SUPPORT PROJECT C.U.R.E. WITH SINGLE ORIGIN NICARAGUA, KENYA AND WORLD BLENDS. EVERY $9 DOLLAR BAG OF C.U.R.E. COFFEE SOLD DELIVERS $60 IN MEDICAL RELIEF.

CORPORATE PARTNERSHIPS

C.U.R.E. COFFEE

First Lady of Kenya helps load a container.

Outpatient facilities in Kenya being constructed in partnership with Tullow Oil and outfitted by Project C.U.R.E.
With the support of countless local and national organizations, the Denver Distribution Center continues to grow. Last year we successfully packed and shipped 55 40-foot container valued at $20.5 million with the help of passionate volunteers generously giving nearly 53,000 hours of volunteer time. Project C.U.R.E. Denver also hosted several special events including a visit from Vicente Fox, former President of Mexico, who learned more about our partnership with Curando México. During his visit, we celebrated the departure of the 70th 53-foot trailer destined for Mexico, that was filled with critical medical supplies and equipment. The President also learned about the Kits for Kids program from our Junior Ambassadors from Compass Academy School. We also hosted Kroenke Sports Charities and members of the Colorado Avalanche for a day of sorting and packing supplies.

Our Kits for Kids program continued to grow in Denver, as Colorado Girl Scouts and the Colorado Notre Dame Senior Alumni Club partnered with us. Sincere thanks to Carol and John Grudis, for donating a new box truck, allowing us to expand our network of local hospital and healthcare procurement partners.

And finally, Gene Osborne, a longtime friend of Project C.U.R.E. sponsored the restoration of “Miss Annie,” a 1951 International Harvester L-150 by Mike Wiley Restorations. Miss Annie and Boy Scout Pack 628 participated in the Highlands Ranch July 4th Parade and she now serves as the “welcome wagon” for Project C.U.R.E. events and for visitors to the Denver Distribution Center.

DENVER DISTRIBUTION CENTER

CHICAGO DISTRIBUTION CENTER

Last year our Chicago Distribution Center was growing and on the move! On May 19, 2018, Project C.U.R.E. Chicago hosted approximately 100 guests for an Open House at our new location in Woodridge, Illinois. The new Distribution Center is 55,000 square feet, compared to our former warehouse, which was only 31,000 square feet. This move enabled us to grow the Project C.U.R.E. mission by procuring additional medical supplies and equipment and by sending more containers to hospitals and clinics that need it the most. During the celebration, Douglas Jackson, Project C.U.R.E. President and CEO, shared his vision for Project C.U.R.E. Chicago, and participants enjoyed a lovely lunch buffet.

With 75 surrounding hospitals in the Chicagoland area and key partnerships with major healthcare systems and manufacturers, Project C.U.R.E. Chicago expects a bright future of delivering health & hope to the world.
Project C.U.R.E’s Mid-Atlantic Distribution Center south of Philadelphia in West Grove, Pennsylvania is primed for growth and success with its access to large transportation arteries and port facilities as well as its proximity to major hospitals and medical suppliers and distributors. It is also fortunate to be located in an area with a rich history of volunteer service and philanthropy.

“Project C.U.R.E. had been considering a foothold in the middle Atlantic states for more than five years,” said George Hatzfeld, a long-time assessment volunteer from Philadelphia. “When all the pieces came together we realized the new location in a fast-growing corner of Pennsylvania is exactly what the operation needs.”

Starting with an empty warehouse and no volunteers, the Mid-Atlantic Distribution Center has grown to be a vibrant partner in the Project C.U.R.E. family. Receiving a warm welcome from the community, great partnerships have formed with local hospitals, businesses, nonprofits, schools, and community organizations—all of which have been eager to donate and volunteer.

Kathy Hrenko, Operations Director notes, “While many people may never have an opportunity for global travel or mission work, the Mid-Atlantic Distribution Center will give hundreds and eventually thousands of volunteers the chance to have a hand that reaches around the world to make a difference.”

Since opening, the Distribution Center has delivered cargo containers to 14 countries from Grenada to Mozambique. With only two years of experience, the Mid-Atlantic Distribution Center surpassed their 2017-2018 goal by 50% sending out 15 containers valued at more than $4 million. This achievement was celebrated with an Appreciation Luncheon during which Dr. Douglas Jackson shared the impact of the valuable work provided by the Mid-Atlantic Distribution Center volunteers. Special volunteer awardees included Larry Persing, Volunteer Warehouse Manager who provided more than 900 hours of service and Doreen and Brent Lecheler, both of whom received Project C.U.R.E. Lifetime Achievement Awards.

It is the valuable commitment of organizations like Deloitte, who promote volunteer service within their local communities, which enables Project C.U.R.E. to meet its mission. Deloitte was the Mid-Atlantic Distribution Center’s first corporate volunteer partnership to host a day of service onsite. The 2017 Deloitte Impact Day brought the support of 29 volunteers providing 174 hours of service and packing 297 boxes of medical supplies. Thrilled with the experience, Deloitte plans to return next year and create Impact Days at all of the Project C.U.R.E. Distribution Centers across the country.
Last year the Nashville Distribution Center packed and sent 28 40-foot containers—including a record five containers loaded within a seven-day period. We welcomed many volunteers—old and new—and forged ongoing service partnerships with a variety of religious institutions, corporate groups, civic groups, local nonprofits, and student groups from all over the country. In addition to collaborating with local students from Vanderbilt, TSU, Lipscomb, Belmont, and Meharry Medical College, we hosted at least nine universities from other states for alternative break programs. The Nashville Distribution also experienced a major facelift—with a new roof, new lights, new tables, a new forklift and cardboard baler (both donated!) and lots of new “Project C.U.R.E. Red” walls.

Project C.U.R.E.'s Phoenix Distribution Center is in growth mode—sending 36 40-foot containers of critical medical supplies and equipment valued at more than $13.7 million last year. What’s more, the Distribution Center was humming with activity. Young and old, our volunteers donated nearly 40,000 hours of time last year, helping us collect, sort, and pack supplies for delivery to under-resourced clinics and hospitals around the world. Super Sort Saturdays became a regular occurrence in Arizona, where hundreds of volunteers from all walks of life came to our facility and helped us prepare shipments. And, none of the work would be complete without the help of our corps of interns who help with events, organizational administration, and warehouse support.

The Phoenix Ambassador Board took engagement to a new level this year. As a result of their passion and fervor for Project C.U.R.E. they helped kick start our Biomed program and helped fund global trainings of Helping Mothers Survive and Helping Babies Breathe. Ambassador Board members, Brian and Irene Fabig hosted the 8th Annual Casino Charity Party for Project C.U.R.E., raising funds for the Grace International Orphanage in Haiti. Additionally, members of the Ambassador Board engaged in all of our programs this year—delivering C.U.R.E. kits to Ecuador, sponsoring containers to Myanmar, DRC and Cameroon, conducting Needs Assessments in Honduras and India, leading a Container Delivery Support trip to Nigeria and participating in PhilanthroTravel trips to Zambia, Guatemala and Panama.
Project C.U.R.E. hosted the First Lady of Zambia, H.E. Esther Lungu at The First Ladies Luncheon last fall in Denver. More than 1,100 guests attended the luncheon and heard Her Excellency’s message of hope for women living in rural and hard to reach areas of Zambia. With 70 to 80 percent of the population in Zambia living on less than $2 per day, the First Lady is passionate about access to healthcare and maternal and child health. Because of the generous support of our guests and by working together, the First Lady, Project C.U.R.E., the Coca-Cola Company and our other program sponsors will ensure that mothers, babies and children have access to quality healthcare in Zambia. At the event, Project C.U.R.E. raised enough funds to deliver more than $2 million worth of medical supplies and equipment to Zambia. The impact that this medical relief will bring to the people of Zambia will be life-changing and life-saving.

FAUX WEDDING
Project C.U.R.E.’s Chicago Young Professional Network hosted the 2nd Annual Faux Wedding in November. More than 100 guests attended the “fake” nuptials, allowing guests to relive everything they love about weddings—dancing, socializing, drinks, and cake—while raising more than $17,000 for Project C.U.R.E. Proceeds from the event supported partner hospitals in Haiti and helped fund containers that were just short of their fundraising goals. It was a fun evening where everyone helped deliver health & hope to the world!
NEWMONT MINING CONTINUES ITS PARTNERSHIP WITH THE COLORADO ROCKIES & PROJECT C.U.R.E.

Since 2016, the Newmont/Project C.U.R.E. partnership has expanded to include the Colorado Rockies K-Meter initiative. For every strikeout thrown by a Rockies pitcher, Newmont donates $50 to Project C.U.R.E. Through this exciting initiative Newmont donated more than $570,000 in the last three seasons combined, benefitting developing communities each month. Thus far, the donations have been used to fund deliveries to communities in Papua New Guinea, Ethiopia, Kenya, Philippines, Cote d’Ivoire, Cameroon, Mexico, Cuba, Tanzania, Belize and Mali. That’s more than $3 million in medical equipment and supplies. “Newmont is proud to partner with the Rockies and Project C.U.R.E. to translate great performance on the field to better healthcare around the world,” said Newmont President and Chief Executive Officer Gary Goldberg.

ON TAP WITH KBCO

In 2017, the Denver Young Professionals Network coordinated more than 100 volunteers to help pour beer at the On Tap with KBCO Concert featuring LP, Magic Giant, Brent Cowles and Leon Bridges. This was the second year we participated in the KBCO On Tap Concert Series at the Breckenridge Brewery with 7S Management. A massive crowd of 3,000 people attended the concert and Project C.U.R.E. raised enough money to deliver one container of life-saving medical equipment and supplies valued at approximately $400,000 to deserving hospitals in Belize.
Project C.U.R.E.’s Denver Young Professionals Network, along with Presenting Sponsor PanTheryx, hosted the 7th Annual High Rollers for Health & Hope—Havana Nights Gala to raise funds to help support Mexico following the two deadly earthquakes in September 2017. More than 250 of Denver’s business leaders, community partners and philanthropists were transported back to Old Havana and enjoyed mojitos, music, cigars and casino gaming while raising funds to deliver $2.3 million worth of medical equipment and supplies to deserving hospitals and clinics throughout Mexico as they rebuilt from the devastating earthquakes.

GOLF TOURNAMENT

A sold-out field of 120 golfers enjoyed a fabulous round of golf at the spectacular Sanctuary Golf Course during the 14th Annual Project C.U.R.E. and Newmont Mining Golf Tournament. As golfers spent the day on the course they enjoyed the chance to hit a hole-in-one and win a two-year lease on a 2017 Corvette Convertible provided by our friends at John Elway Chevrolet; drive the green to support Kits for Kids; and experience the thrill of watching a professional golfer hit their drive. The golf tournament is one of Project C.U.R.E.’s most important annual fundraisers, and has raised more than $2.25 million—sending over $43 million worth of life-saving medical relief to children, women and men in developing nations over the last 14 years. Newmont Mining has been the Title Sponsor since 2008, and through our partnership, Newmont has helped Project C.U.R.E. deliver 19 cargo containers of medical relief to Ghana, Indonesia, Guinea, Haiti and Peru—impacting more than 800,000 people.
20% INCREASE IN VOLUNTEER HOURS WITH THE IMPLEMENTATION OF PROJECT C.U.R.E.’S NEW SYSTEMS. VOLUNTEERS ACROSS THE SPECTRUM CAN ACCURATELY REPORT AND TRACK THEIR HOURS.

SOURCES OF REVENUE

- Corporations: 47.73%
- Nonprofit organizations: 26.12%
- Foundations: 9.08%
- Special events: 6.96%
- Federal government: 10.11%
- Individuals: 2.12%
- Administrative/fundraising: 2%
- Programs: 98%

USE OF FUNDS

Project C.U.R.E. operates with just 2% administrative and fundraising costs, so that 98 CENTS of every dollar donated is invested directly into our programs.

The financial statements present the financial position of Benevolent Healthcare Foundation dba Project C.U.R.E. as of May 31, 2018. All figures are reported in accordance with generally accepted accounting principles in the United States of America. Project C.U.R.E. is the recipient of the GuideStar Exchange Platinum Seal, the Charity Navigator Four-Star Rating and is ranked by Forbes as one of the 20 Most Efficient Large U.S. Charities.

FINANCIALS 2018

Patients in Vietnam show appreciation to the team for the delivery of medical supplies and equipment.

**NOTE 7:** Non-cash contributions consist of the following donated goods, services and facilities: Medical supplies ($72,333,111); C.U.R.E. Kits ($810,500); Transportation & Other ($123,126); and Warehouse and Office Rental Space ($280,000). During the year ended May 31, 2018, non-cash goods contributed exceeded shipment of goods by $11,385,134, resulting in an increased inventory supply. Non-cash expenses related to goods shipped exceeded non-cash revenues by $3,417,440 during the year ended May 31, 2017, resulting in a decreased inventory supply.
HOW CAN YOU HELP

GIVE much-needed medical supplies and equipment to developing countries around the world.

SERVE by helping locally at a Project C.U.R.E. Distribution Center or collection center near you.

SPONSOR a container.

DELIVER health & hope to the world on a C.U.R.E. Clinics trip.

TRAVEL on a one-of-a-kind PhilanthroTravel trip—where altruism meets adventure.

TAKE a C.U.R.E. Kit with you on your international travels.

SPONSOR and SEND a C.U.R.E. Kit with another traveler.

GATHER friends, family, and basic necessities, then fill and drop Kits for Kids at a Distribution Center near you.

TELL your friends and followers about Project C.U.R.E. on Facebook, Twitter, and Instagram.

FUNDRAISE for a Project.

DONATE to a Project.

U.S. LOCATIONS
